

EVERGREENCloud: The Complete Video Communications Solution

EVERGREENCloud allows you to quickly and easily experience the latest Compunetix anywhere video solution based on our **EVERGREEN** technology. Whatever endpoint you choose, EVERGREENCloud will guarantee the easiest multipoint connectivity and the widest possible interoperability. It's advanced network performance and security allows Compunetix to deliver all the benefits of our innovative video conferencing technology through the cloud.

EVERGREENCloud enables easy HD (high definition) video conferencing capabilities from your laptop leveraging browser WebRTC technology with no download required. It can run massive video events with thousands of participants and allow PSTN (public switched telephone network) participants to join your video conference.

No matter the endpoint, EVERGREENCloud will guarantee the easiest connectivity and the most reliable interoperability. Try out the vast capabilities of EVERGREENCloud by signing up for a free trial today at www.myevergreencloud.com.

Compunetix Establishes Itself as the Future of Dispatch Communications

Compunetix exhibited for the first time at the [Railway Interchange](#) show at the Indianapolis Convention Center, September 17-20, 2017. This show was a combined exhibit for the Railway Supply Institute

(RSI), Railway Engineering-Maintenance Suppliers Association (REMSA), American Railway Engineering and Maintenance-of Way Association (AREMA), and Railway Systems Suppliers, Inc. (RSSI).

Compunetix has been manufacturing voice communications systems for command centers for decades and was showcasing these solutions, along with integrated multimedia (streaming video, imagery, video teleconferencing and data).

Mike Hockenberry, Compunetix Vice President, remarked, "We were very pleased with the enthusiasm with which our dispatch communications solutions were

received by the show attendees. The rail industry is increasingly challenged with maximizing efficiency, ensuring safety, and managing crises. Integrating voice, video, imagery and data provides dispatchers with new capabilities such as in-cab video monitoring, drone control and remote

inspection."

The Advantages of Compunetix JITC Solutions

Compunetix has a long tradition of [JITC certified equipment](#) dating back to the early 2000's. With systems ranging up to 3,840 ports, we are the most scalable solution available on the DISA Approved Products List.

Compunetix products are known for their reliability and longevity with systems boasting a reliability rating of 99.9996%. It is common for our equipment to last for 15 years or more. In fact, Compunetix is so confident in our products that we have instituted the only "Lifetime Support Guarantee" in the market. This ensures that Compunetix provides the lowest Total Cost of Ownership (TCO).

Our JITC certified products offer the most extensive feature set available. The JITC Certified Contex Summit® simultaneously supports multiple call flows such as passcode meet-me, blast-dialing and operator assisted conferencing. Our Windows Operator Client allows for advanced call control, diagnostics and on-the-fly audio adjustments. The ability to move conferees from conference to conference, mute and unmute lines, perform gain adjustments and initiate a sub-conference are just a few examples of the capabilities the Operator Client provides.
