

ConferenceManager™2 Re-Certified by the Defense Information Systems Agency

JITC CERTIFIED

Congratulations to Sonexis, a Compunetix brand, on their 2018 JITC Certification for the ConferenceManager2 platform!

The [ConferenceManager2](#) solution is an integrated audio conferencing platform which has been certified by the [Defense Information Systems Agency \(DISA\) Joint Interoperability Test Command \(JITC\)](#) Certification testing and is listed on the [Department of Defense \(DOD\) Unified Capabilities Approved Products Listing Accreditation](#). This communication system is a state-of-the-art audio conferencing platform engineered to deliver a highly secure, comprehensive, audio conferencing solution for operationally demanding environments. The system is compatible with all APL-listed voice switches and offers unmatched operational flexibility supporting ad-hoc and scheduled conferences as well as pre-set blast dial sessions.

First given JITC Certification in May of 2011, the ConferenceManager2 has since delivered as secure conferencing solution to several government organizations of all branches across the nation. Building upon success, Compunetix and Sonexis have received certification for our latest JITC ConferenceManager2 on DISA's Approved Products List through the year 2021. We are both proud and excited to keep the JITC-Certified ConferenceManager2 on the market and continue to deliver superior security and reliability.

Compunetix Launches the EVERGREEN Video MCU Trade-Up Program

Have an Obsolete Video MCU?

**Trade UP to
EVERGREEN™**

Compunetix, Inc. a global leader in carrier-grade infrastructure and high definition video collaboration solutions for room, desktop, and mobile users, is excited to announce a new [Video MCU Trade-Up program](#). This program enables the exchange of obsolete video conferencing MCUs that are currently end-of-life - such as discontinued Lifesize, Cisco, Avaya or Polycom units - for credit toward a brand new [EVERGREEN Video Collaboration System](#).

The EVERGREEN platform has been engineered to deliver the very best video quality and reliability, no matter how large your video event or which video endpoints you use for your meetings. Video conferencing can be experienced not just through traditional video room systems, but also through a secure, one-click access using the CompanionWeb browser-based WebRTC technology. With easy-to-use and customizable client interfaces, the EVERGREEN solution family is optimized to naturally meet business's growing video requirements.

For more information about this program and our EVERGREEN Video Collaboration Systems, please contact [Antonio Capodiecì](#).

Compunetix Highlighted on TechVibe Radio Show

TECHvibe)))
Tune In. Geek Out! KDKA 1020 AM
