Internationalization

The completely redesigned CONTEX Reservation, Scheduling, and Billing (RSB) 5.0 system offers an efficient, customizable, innovative platform to manage all back-office operations for unattended and attended conferences. The CONTEX RSB 5.0 comprehensively merges the three elements of conferencing—reservations, scheduling, and billing—through a feature-rich, web-based interface. In addition to its broad capabilities, the RSB 5.0 provides the same quality and reliability expected of every product in the Compunetix CONTEX line. When employed with the CONTEX Summit® media processor, the easy-to-use software package provides a complete solution for conference management.

Innovative

The RSB 5.0 has been re-engineered to provide greater scalability and performance.

- **Architecture:** Upgraded compatibility with the Microsoft SQL Server allows the RSB 5.0 to utilize a reliable, robust, and high-level database.
- **Pattern Reservations:** Arrange reservations for recurring conferences in an instant.

Efficient

- **Account Management:** Create, remove and modify hierarchical customer accounts with ease.
- **Web-based:** Save time by enabling end users to access and modify reservations without the aid of a reservation agent.
- **Data Migration:** Import/integrate information from other databases.
- **Reports:** Generate and view reports detailing reservations, scheduling, and system utilization with a single click, or effortlessly export report details into various mediums including Microsoft Word, Microsoft Excel, Adobe® PDF, and more.
- **Multi-Tenant Capable:** Simultaneously support multiple tenants accessing the system on custom client interfaces.
- **Notifications:** Send and receive notifications on the status of an upcoming conference.
- **Passcode Server:** Smoothly incorporate end-user passcode data within the system.

Customizable

With its advanced account model, the RSB 5.0 can be modified to meet the needs of any client.

- **Billing:** Set universal rates and charges, and tailor specific billing parameters per account.
- **Internationalization:** Convert the system into one of the included languages or simply format the system into any language through Unicode translations.

- **User Roles:** Easily assign the hierarchical level of access of each user in the system.
- **Branded Interfaces:** Upload logos and customize text elements to create a personalized, branded interface; enabling clients to function as resellers.

Edit Rate Window

Feature-Rich

- **Time Zone Management:** Control time zone settings for the platform, accounts, users, and specific events.
- **User Session Management:** Keep the system secure by monitoring user activities and restricting unauthorized user access.
- **Search Capabilities:** Quickly perform searches within the database, and filter results to find specific records.
