## Chorus Call Asia Achieves Massive Video Conferencing Success Based on EVERGREEN™ Platform

Monroeville, Pa., June 2, 2016 – Compunetix, Inc., a global leader in carrier grade infrastructure and high definition video collaboration solutions for room, desktop, and mobile users, announced that Chorus Call Asia has been using the EVERGREEN™ family of MCUs in their service bureau to create a new benchmark in collaboration – massive video conferencing. As mobile video use grows, reliable, massive events that connect legacy, desktop and mobile participants is an expanding part of the new workplace.

“Chorus Call Asia takes full advantage of the massive conferencing capabilities for which the EVERGREEN family of MCUs was designed. We feel very proud of the success that they are seeing as they continue to push our modern workplace solutions to meet the very demanding conferencing and collaboration requirements of the Japanese market,” stated Jim Klueber, Division Manager for the Video Systems Division at Compunetix.

Chorus Call Asia has deployed the EVERGREEN in both public and private data centers where they offer a full suite of conferencing and collaboration services to their clients. Tadao Kondo, President of Chorus Call Asia notes, “In our general services data center, we frequently support 200 to 300 or more party video conference calls for some of our larger customers using the EVERGREEN. We searched and found no other platform on the market that would allow us to host such events. Not only do we handle very large conferences, but we also support very high volumes of conferences on our EVERGREEN systems as well. During the month of April 2016, at one of our privately managed service customers, we provided more than 4200 video conferences on their system.”

Chorus Call Asia is planning further growth of their EVERGREEN systems in the coming months to meet their growing customer base. Compunetix released the EVERGREEN family of MCUs in 2010 and it has become the most massively scalable MCU platform on the market. Chorus Call Asia and other service providers are choosing Compunetix because of the commitment to conferencing and collaboration, complete spectrum of deployment options, and market longevity.

Launching a conferencing and collaboration service? To learn more about the EVERGREEN’s capabilities along with the associated Companion Suite of products and services, please visit Compunetix at InfoComm 2016 in booth N2539. InfoComm is the largest event in the United States focused on the audiovisual industry, and will be held at the Las Vegas Convention Center on June 4 – 10. With more than 950 exhibitors, thousands of products and 40,000 attendees from 108+ countries, the InfoComm show is the once-a-year opportunity to see the latest technologies. For a free pass to attend this premier event, visit [www.infocommshow.org](http://www.infocommshow.org) and enter code COM175 when registering.
