Web Video Collaboration

Elevate your meetings to the next level with high quality, WebRTC video communications

Companion Web is a web-based video collaboration solution built with dynamic WebRTC technologies. This reliable, customizable, and intuitive platform lets users take the leap into the next generation of high-quality remote video communications.

Its easy-to-use video interfaces streamline communication and simplify the experience for all users. Companion Web seamlessly supports one-on-one and multi-point collaboration either for Web-only or mixed (WebRTC + H.323/SIP endpoints) conferences.

With no downloads required, it couldn't be easier to experience the unmatched quality and feature-rich capabilities of Companion Web.

Customized & Secure Multi-point Video Collaboration

The top screenshot shows a multi-point video call interface. The main window displays a man in a light blue sweater, and a smaller window shows a woman in a yellow top. The interface includes a top bar with the Compunetix logo and various control icons.

The bottom screenshot shows a screen sharing session. The main window displays a presentation slide titled "Worldwide System Installations" with a world map and a list of countries. The list includes: USA, Canada, Mexico, Brazil, South Africa, UK, France, Germany, Netherlands, Norway, Saudi Arabia, India, Israel, Malaysia, Australia, New Zealand, Japan, China, Hong Kong, South Korea, Oman, Nigeria, Thailand, UAE, Greece, Denmark, Ireland, Italy, Scotland, Spain, Singapore, Sweden, Switzerland, Taiwan, Paraguay, and Panama. The slide also states "Currently Installed in Over 35 Countries".
