

# Compunetix Vertical Segment Solutions

*Expertly Crafted Solutions and Applications for  
Industry-Specific Workflows*

# Unique Features. Dynamic Functionality.

# Workflow-Focused.

Beyond our focus on high security and reliability, one of the primary strengths of our audio, web, and video solutions is their extensive feature sets, engineered to embrace unique business processes and industry specific workflows. From real-time call management tools and video transfer to our flexible deployment options, each solution can be easily customized to meet your organization individual requirements. Review some of our existing vertical solutions below, but don't stop there; if you don't see your industry listed, we'd love to discuss how we can help meet your unique needs.

## Purpose-Built Industry Solutions

### Virtual Court Proceedings

Compunetix virtual court solutions address the growing backlog of court proceedings with a cost effective solution that increases efficiency and reaches mobile constituents in a timely manner. Offering audio and HD video connectivity, sub-conferencing support, real-time call management and a strong focus on security, this comprehensive solution enhances the overall experience for judges, lawyers, and defendants, while also improving the productivity of the courts at large.

### Emergency Conferencing & Notification

When an emergency occurs, it is critical that companies have the necessary tools available to respond quickly and effectively. Emergency conferencing is activated by dialing a dedicated emergency number, triggering a blast dial-out to the other members of the response team, and instantaneously creating a conference. Each team member is then joined directly to the emergency conference in progress where response efforts and coordination can begin. This solution is available both as a hosted service or as an on-premises solution.

### Healthcare & Telehealth Solutions

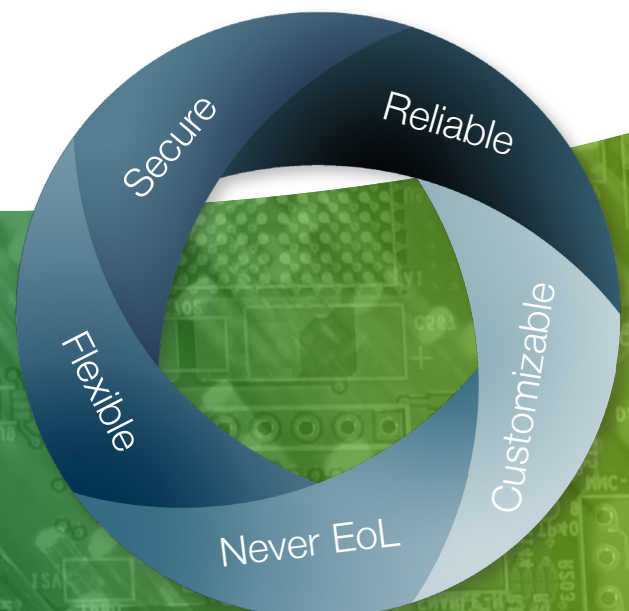

Our powerful telehealth application effortlessly expands healthcare access through remote HD video-conferencing visits. With simple, one-click connections to doctors, video transfer and escalation capabilities, versatile connectivity (PC, mobile, kiosks), and a fully brandable interface, Compunetix delivers reliable, professional access to healthcare from anywhere, at anytime.

### Trading Communications

For financial environments, our trading solutions combine system flexibility with a robust application suite to provide quick and reliable communication. This comprehensive solution offers trading turrets, "hoot-n-holler" environments, outside lines, 24/7 open lines, and other trading system endpoints that can be seamlessly integrated to provide traders and back office teams with direct access to their most vital resources.

## Providing the right solution For *Your* Business

Helping you streamline communications and services with purpose-built applications that meet your unique business requirements. Discover the exceptional benefits of Compunetix Industry Solutions and find out how we can help you to work smarter, respond faster, and communicate better.

Quality. Security. Reliability.

## Meeting your *unique workflow requirements*

### **Executive Call Management & Support**

Executive-level meetings require higher security, quality, and support standards to ensure they run smoothly and remain private and uninterrupted. Compunetix's Executive Support solution enables dial out invites to join conferences at their scheduled time, real-time operator support whenever it is needed, as well as ongoing oversight of all system activity for an added layer of security.

### **Hospital Transfer & Access Centers**

The Compunetix Transfer Center is an advanced conferencing solution with purpose-built tools to effectively bring together the physicians needed for a prompt consult, coordinate transportation for a patient, arrange for a bed, and ensure the most appropriate level of care for that patient upon their arrival. Compunetix provides the visual tools that enable expert Transfer Center staff to effectively perform their critical duties.

### **Transportation Communications**

In response to ever-present threats to transportation infrastructures worldwide, incident and crisis management systems are becoming critical. Meeting compliance requirements for transportation security and emergency services, our platform helps to initiate first responder actions and manage the full life cycle of a crisis, allowing transportation centers to instantly coordinate resources or connect to first responders - aligning efforts, saving time and, potentially, lives.

### **Media & Broadcasting Communications**

Whether you're communicating with internal team members, or coordinating with the camera crew on a live set, our media and broadcasting solutions offer dynamic functionality that enhance both on and off air communication channels.

### **Education Collaboration & Distance Learning**

Our distance learning solutions deliver expanded access for universities and corporations looking to provide instant educational courses through virtual and telephonic channels. With audio, web, and video options, support for breakout sessions, classroom engagement tools (hand raising, polling, Q&A, whiteboarding), and real-time support, these user-friendly solutions enable convenient, reliable access to lectures, seminars, and training sessions from anywhere, at any time.

### **Energy & Utilities Crisis Management**

For energy and utility companies, meeting recovery time objectives during an outage is key to meeting the needs of their customers. Having the critical conferencing infrastructure available is a must. Our reliable Emergency Conferencing solutions eliminate the need to spend valuable time and resources resolving an issue one department at a time, making it easier than ever for providers to manage crisis and share crucial information efficiently and effectively.

# Compunetix

## Vertical Segment Solutions

### Healthcare Collaboration

Solutions designed to enhance and expand options for patient care, as well as streamline internal hospital operations.

### Trading Communications

Flexible and robust application suite to provide quick and reliable communication for trading environments.

### Energy & Utilities Crisis Management

Improve recovery times, manage crises, and share crucial information efficiently and effectively when outages occur.

### Emergency Conferencing & Notification

Offers advanced communication abilities to streamline emergency response and notification efforts.

### Education Collaboration

Feature-rich solution to support remote learning environments for both education or corporate training needs.

### Media & Broadcasting Communications

Secure, reliable solutions for live broadcast communications and internal collaboration.

### Executive Call Management & Support

Highly secure, operator monitored and supported solution for Executive and C-Level meetings and communication.

### Courts & Legal Collaboration

Improve remote appearances for local, state, and federal courts with secure HD video and court management solutions.

### Transportation Communications

Communication tools to enabling rapid crisis response in vulnerable mass transportation environments.
